

— Know the BVD status of **your herd**
 — Know the BVD status of **individuals**

Break Free from BVD

I don't know my **herd** status

OR

Establish BVD Status in BEEF HERDS

*You can also get a BVDFree herd status through testing individual animals when every animal in the herd has a BVDFree individual status

I want to know the BVD status of my **herd**

Test your **young stock**

Blood sample 5-10 calves (9-18 months of age, unvaccinated) from each management group and test for antibody

+ve

Discuss with your vet how to identify whether there are any PI animals in your herd

-ve

To maintain status antibody test 5-10 unvaccinated calves (9-18 months of age) from each management group at least yearly

I want to know BVD status of **individuals***

Test your adult herd (optional)

Blood samples from 10 cows /breeding bulls in each management group (unvaccinated)

-ve

+ve

Remove any PI animals ASAP

All cows in my herd have been vaccinated

Test all animals for PI (all cows, calves, bulls)

+ve

To maintain status continue to tag and test (or blood sample) all calves, including aborted fetuses and stillborns and any animals brought on to the farm

-ve

-ve

Test the whole herd for PI (optional)

Test your **young stock for PI**

Tag and test (or blood sample) all calves, including aborted fetuses and stillborns.

+ve

Remove any PI animals ASAP
